PROFESSIONAL SUMMARY

A skilled and experienced Power Platform / SharePoint developer and consultant with years of experience in designing and developing solutions for various clients. Proficient in Canvas Apps, HTML, CSS, automated approval workflows, and more. A reliable and collaborative team player with excellent communication and problem-solving skills.

EXPERIENCE

MICROSOFT POWER PLATFORM DEVELOPER

May 2022 – present | FEV Group, Aachen, Germany

- Harnessed advanced features of the Microsoft 365 platform to build solutions for internal employees and departments.
- Developed in Power Apps, Power Automate, and Power BI to craft apps, flows, and dashboards.
- Utilized SharePoint, Teams, Azure, and Microsoft Graph on how they interact and connect with the Power Platform suite.
- Trained & consulted with employees who need assistance understanding and using these technologies.
- Used agile management principles and provided updates using a project management tool.
- Collaborated with teammates to share ideas, surface issues, and overcome roadblocks.

IT ASSISTANT

Aug 2020 – May 2022 | FEV North America, Inc., Auburn Hills, MI

- Received company exposure and training to Microsoft Power Platform, Azure AD, and SharePoint Online.
- Performed repairs and troubleshooting solutions to PC hardware, operating systems, and software applications.
- Responded to user requests for service and helped develop solutions.
- Added to and updated FEV's intranet, including "how-to" and FAQ's.

PROJECTS

FEV'S GLOBAL STRATEGY APPLICATION

- Led the design and development of FEV's Global Strategy Application, a Power Platform solution that helped set strategic measures across all subsidiaries that aligned with FEV's long-term and short-term goals, getting rid of tedious emails, spreadsheets, and slides.
- Conducted weekly meetings with stakeholders to provide updates on progress and keep expectations and deadlines aligned.
- Wrote documentation to provide stakeholders with clear understanding of the design and development process and could easily maintain the solution in the future.
- Supported continual improvement of the app after deployment by resolving issues and implementing new features to ensure that the solution remained up-to-date and met the evolving needs of the business.

GLOBAL SHAREPOINT ONLINE IMPLEMENTATION

- Transitioned multiple FEV subsidiaries from using nothing or outdated intranets to SharePoint Online.
- Defined global design standards, structure, and training material.
- Trained and consulted with employees who needed assistance understanding and utilizing SharePoint Online.
- Implemented Power Platform solutions into SharePoint Online for specific department use cases.

FORM DIGITALIZATION AND AUTOMATION

- Designed and developed reusable responsive form solutions for SharePoint Online sites.
- Created standardized templates for automated emails and Teams messages using Markdown, JSON, HTML, and CSS.
- Documented, developed, tested, and trained stakeholders on their form's automated approval workflows.
- Reduced costs by building within FEV's current license with Microsoft, and not using third-party tools.
